

KÜBRANUR DOĞAN

COMPUTER ENGINEER

I am a recent Computer Engineering graduate with a strong ability to adapt quickly and a deep motivation to continuously improve myself. I'm passionate about learning new technologies, collaborating in team environments, and contributing to meaningful projects. With genuine enthusiasm for the tech world, I'm ready to take on new challenges and grow as a developer.

EDUCATION

**Kahramanmaraş Sütçü İmam
University - Computer Engineering**

09/2019 - 12/2024

**Google Game and Apps
Academy**

Flutter Development
Education

10/2023 - 08/2024

FOREIGN LANGUAGE

- English *B1 level*

PROGRAMMING LANGUAGES

- Frontend: React, Next.js, TypeScript, JavaScript
- Mobile: Flutter, Dart
- Backend: Node.js, Express
- Database: MongoDB, MySQL
- Tools: Git, Vercel, Postman, GitHub
- AI: OpenAI API, Embeddings, Vector Search

CERTIFICATES

- Google Project Management- Specialization Package
- Coursera- Applied Figma
- BTK Academy- Applied Canva
- BTK Academy- Cloud Computing with Cloud

EXPERIENCES

TRIPOD MEDIA AND SOFTWARE - INTERNSHIP

Frontend Dev. - 08/2022

UGUR REFRIGERATION COMPANY - INTERNSHIP

Hardware - 08/2023

TRIPOD MEDIA AND SOFTWARE - INTERNSHIP

Frontend Dev. - 02/2024 - 09/2024

I worked remotely for approximately six months, during which I had the opportunity to contribute to front-end web projects and collaborate in team environments. Throughout this period, I improved my skills in HTML, CSS, and jQuery.

PROJELER

● AI-Powered Movie Recommendation App

Technologies: React, TypeScript, OpenAI Embeddings

- Built an AI-driven recommendation system that converts natural language queries into vector embeddings and returns the top 10 semantically relevant movies.
- Implemented similarity scoring for context-aware search beyond simple keyword matching.
- Designed a clean, fully responsive UI for a smooth browsing experience.

● Quick & Easy Recipe App (Mobile)

Technologies: Flutter, Dart, TheMealDB API, OpenAI API

- Developed a cross-platform recipe application with features like category browsing, detailed recipe pages, and a favorites system.
- Implemented an AI-powered cooking assistant that generates meal ideas and guides users with natural language queries.
- Built a fast, intuitive mobile UX with Flutter's modern navigation and UI components.
- Designed a clean, fully responsive UI for a smooth browsing experience.

● Dessert Shop – E-commerce Web App

Technologies: React, TypeScript, Vite, Bootstrap

- Created a modern and responsive e-commerce interface with smooth animations and user-friendly design.
- Implemented core e-commerce features such as cart management, quantity control, and product browsing.
- Optimized performance using Vite, ensuring fast load times and efficient rendering.
